Combat Heatstroke at work May-September 2019

- Against the heat illness —

A lot of workers die or are seriously ill from heat stress every year. The Ministry of Health, Labour and Welfare promotes 'Combat heatstroke' Campaign to show cautions and practices against the heat illness at work. Workers' and Employers, let's get together for safer work.

[Campaign Period] : 1 May – 30 September 2019 (April 2019 for preparation, July 2019 as intensive period)

April	Мау	June	July	August	September
	1 Ma y	Campaign pei	riod		→ 30 Sep
Preparatio	on		Inter	nsive	

Do and check by each period Are you sure? Clear all activities by tick mark!

Preparation (1-30 April 2019)						
<u>Ready for measuring</u> <u>WBGT</u>	Prepare a WBGT device conformed to JIS B 7922					
<u>Written work</u> schedule by WBGT	Write a work schedule with flexibility including break and work interruption according to the WBGT index.					
<u>Consideration for</u> equipment, rest area	Consider a sunshade, ventilation, air-conditioning or cooling mist-shower for reducing WBGT index. Keep rest area with air-conditioning or in the shade.					
<u>Consideration for</u> <u>clothes</u>	Prepare for breathable work suits. Consider work suits with active ventilation or cooling vests.					
Training course	Organize training courses to prevent heat illness.					
<u>Work Management</u> including the responsible officer	Establish industrial health management at workplace Including IH officer for heat illness prevention.					
For emergency	Confirm and share the emergency action to take including hospitals when heat stress syndrome happens.					

 Health examination and intervention Workers with some diseases are more vulnerable to heat stress syndrome: Diabetes, 2) high blood pressure, 3) heart disease, 4) kidney disease, 5) mental disease, 6) skin disease, 7) common cold, 8) diarrhea. Consult physicians before assigning work. Daily health Manager needs to check overdrunk, lack of sleep, Manager needs to check overdrunk, lack									
 Conduct practices as listed: Equipment to reduce the WBGT Rest area Work suits Work time control Acclimatization Take one week for physiological adaptations to the hot atmosphere. Take frequent breaks during the adaptation period. Water and salt Take water and salt regularly. Don't wait until you feel thirsty Health examination and intervention Workers with some diseases are more vulnerable to heat stress syndrome: Daily health Manager needs to check overdrunk, lack of sleep, 	device

managementno breakfast, etc. Inform workers of symptoms of heat stress syndrome for earlier detection.									
Monitor condition Monitor the health condition of workers by manager or coworkers	rkers.								
The officer is to visit sites to check based on WBGT.									
 Measures to reduce WBGT index? Workers are acclimatized? Workers take water and salt regularly? Workers are in good health condition? Emergency action ~in case of the symptom~ suspend current work go to hospital or call ambulance 									

- □ Need intervention for work interruption?
- keep watching

Intensive period (1-31 July 2019)

□ Check the WBGT is reduced effectively. Or additional action. \Box Work interruption or time reduction, and break time to be

- introduced when necessary, especially after the end of rainy season.
- \Box Take water and salt regularly.
- \Box Any health problem such as lack of sleep, mal-condition, or overdrink? Be sure to take breakfast to keep your health condition.
- □ Conduct intensive training on increasing risk of heat stress syndrome.
- □ Call ambulance without hesitation when any abnormal symptom.
