## Regarding of issuing the Home Recuperation Certificate

Toyohashi Public Health Center send you a Home Recuperation Certificate. This certificate certifies the period form the day we confirmed the recuperated person was infected by COVID-19, and requested to have home recuperation, until the day we accepted the end of recuperation. Please note that this certificate doesn't certify the period from the day the symptoms appeared.

In addition, for those who were accepted to end the recuperation withiin 10 days (for example, 7 days if no symptoms, and 10 days if having symptoms, based on the Ministry of Health, Labour and Welfare's criteria), we only certify the start date of the home recuperation and the end date is not written.

Please request to the relevant facility for the period of hotel recuperation or hospitalization.
